

ENGINEERED FLOORS BY MIKASA

Category of Product:
Wooden Flooring
(Engineered)- Brand- Mikasa

USP of Product:

- **Made/Make in India :** Mikasa is the 1st Indian Global Brand of Engineered Wood Floors. Greenlam is the 1st manufacturer of Engineered wooden flooring in India.
- **Engineered for Stability :** The 3 Layered construction make the product stable and fit to use overcoming the nuances of wood.
- **Ease of Installation :** The pre finished planks and the unique glue less technology, PlankLOC, helps to get the floors installed almost instantly. No more mess, debris and waiting endlessly for the lacquer to dry.
- **Environment Friendly:** Various finishes like brushing, staining etc. give Mikasa floors an interesting look to the exclusively selected natural woods and veneers from across the globe. No wood which is illegally felled is ever used by Mikasa. Not just that the all the adhesives and coatings used to manufacture the product are made using water based resins.
- **Long Life:** Every Mikasa creation comes with a warranty of upto 30 Years. In case you ever need, they are present here in India to fully support the products.
- **Largest Collection:** Mikasa offers more than 100 products and countless ways to beautify the floors in various sizes and thicknesses. This is the largest ever collection of Engineered wooden floor being offered in Indian market.
- **3 Premium Collections :** The three premium collections – the 15mm thick Pristine, 13mm Arbor and the new 10mm Atmos will spoil you for choice.
- **Variety of Wood Species:** All woods from Ash to Oak to Walnut, are enhanced with latest available technology without compromising the inherent richness and warmth of nature.
- **Availability :** With an extensive distribution network and presence across all major towns in India, Mikasa is always in reach.
