Coming to the exteriors of your house, with guests buzzing in and out especially during festivals, the façade of a home is the most important. Go for fire resistant, come with special fasteners which are made using non-corrosive materials that offer better colour fastening properties and are chemical resistant. In addition to that, they are energy efficient, easy to install and maintain, durable, and cost effective. A dark and plush looking façade adds a certain attraction to your house and with the right lights, you can add even more depth to these clads.
