

'African Mahogany' flexible veneer from the Decowood Naturals collection, Decowood Veneers by Greenlam.

INSPIRED BY
RODEN CRATER, 1977

Turrell's exploration of light is perhaps best known in the *Roden Crater*, a mammoth artwork, started in 1977 and still under construction, in northern Arizona. A number of chambers and tunnels offer, in varying intensities, exposure to the light of the sun, moon, stars and planets. This recreation showcases one of the apertures, the East Portal.
