

"The ability to pair absolutely any colour whether navy blue, turquoise, teal, mint green ivory, mauve, mustard and tan brown with wooden interiors is definitely a plus factor. It adds to the design quotient and also brings out the wood's natural influence. There is something so relaxing about the lighter shades of the colour palette for your spaces that you feel relaxed. Printed and patterned cabinet knobs in monochromes like chevron or brighter pastels like tangerine and fuchsia quickly add to the vibrancy of the kitchen" - **Greenlam**

"Modular kitchen's offering unique styling in vibrant colours is what gives your kitchen an unmatched lively personality. These kitchens do not have to be monochromatic in colour tone. Add a little spritz of colour with finishes in laminate, UV coated, polymer, solid wood, aluminum, glass etc. to suit the Indian work style and design preferences" - **Evok**
