

GREENLAM Industries' Dual Tones and Blackalicious cater to two distinct interior design trends: nostalgia and uber modern (specifically, the black interior trend that's taking the industry by storm). Sweet Almond, Woodgrain and Golden Antique combine light and dark shades to create patterns that resemble natural wood. In the second range, one can opt for Black X which is ideal for bathrooms, Black Marmor that mimics stone, and Black and Edgy Ash which has a matt, industrial finish. These high-pressure laminates have anti-fingerprint and easy-to-maintain properties.
