

Black X AFX laminates from Greenlam

The Black X shade from the AFX (anti fingerprints) laminates collection by Greenlam Laminates from the house of Greenlam Industries Ltd gives the interiors a look of elegance. Black is an

interesting choice of colour when it comes to sprucing up the bathroom space. The Black X laminate provides a sense of sophistication and class to the space. This black laminate adds a very distinct

contrast to interiors which is very detailed and refined. Since AFX laminate is anti-fingerprint, it leaves the surface impression free and makes it easy to maintain. One can try adding classy elements of white with a unique wall art and cotton towels which can be complemented by a white basin to add monochromatic panache.

While the hues of light create a warm and cosy environment in the space, the dark tones add to the serenity of the space to provide a perfect combination of black and white. The look creates a perfect yin and yang pattern in the bathroom. Embrace the look of mystical shade of Black X and watch it come alive with dark temptations.
