

# Women make life beautiful. And living it too.

We love to celebrate the best in wood and in talent. Which is why the roaring success of Decowood's second season of Design Divas has left us exhilarated on a high note! None of this could have happened without the exceptional talent and choices of wooden veneers made by female designers across the nation.

After calling out for entries, shortlisting **12 designers** to pick winners from was no easy task. With a wave of creative living and design solutions, searching for **3 talented names** that break through conventional design executions and philosophies was a challenge we were glad to meet with! It is this showcasing of talent and enthusiasm that inspires us to create products that can breathe life into any living space with exceptional designing.

All this talent and hard work cannot go unnoticed or unrewarded, and we ensured the same.

Our winners got an opportunity to search for inspiration and admire heritage architect with a trip to Milan known as **Salone Del Mobile Milan**, along with being felicitated at **The Annual Trends Excellence Awards**.

Rewarding winners was followed by a **personalised calendar** appreciating and putting their rising talent and work on the fore front and **Rs. 25,000/- vouchers**, for 9 finalists.

We are grateful for your support and ecstatic for all the creative adventures that lie in the seasons to come, with new talent and perspectives ready to refresh design philosophies.

All this because when life's beautiful, you make living life beautiful too.
