POSTED BY: SACHIN MURDESHWAR MAY 21, 2020

MUMBAI, 21 MAY, 2020 (GPN): A well decorated workspace holds the power to impact your overall wellbeing and the efficiency of your work. Moreover, your personality and preferences play a major role in defining what motivates you to give your best performance every day. As work from home has become the 'New Normal', it has brought an opportunity to discover ways to personalize your work desk that is both comfortable and drives you to work every day.

It is understandable that working from home is not everyone's cup of tea. However, some are most efficient this way. A well organized and a clean work area helps you to tackle your daily tasks in a better way. So, here are a few designing tips to create your 'home office' which doesn't require a renovation!

Shine bright!

Colours have a long-lasting influence on your mood and provide a visual experience that impacts your work. Moreover, we tend to choose colours that release happy hormones in us and resonate with our energy. If you are looking for hues that can enlighten your frame of mind and pump some energy as you work through the day, then choose bright summer hues like yellow or teal. For instance, this Noce Lila wooden floor from Mikasa Real Wood Floors, when you pair its brown shade with pops of colour, the look exudes positivity and radiance. The idea is to pair vibrant hues around your working space that inspires you to give your 100 percent in the work that you are doing.

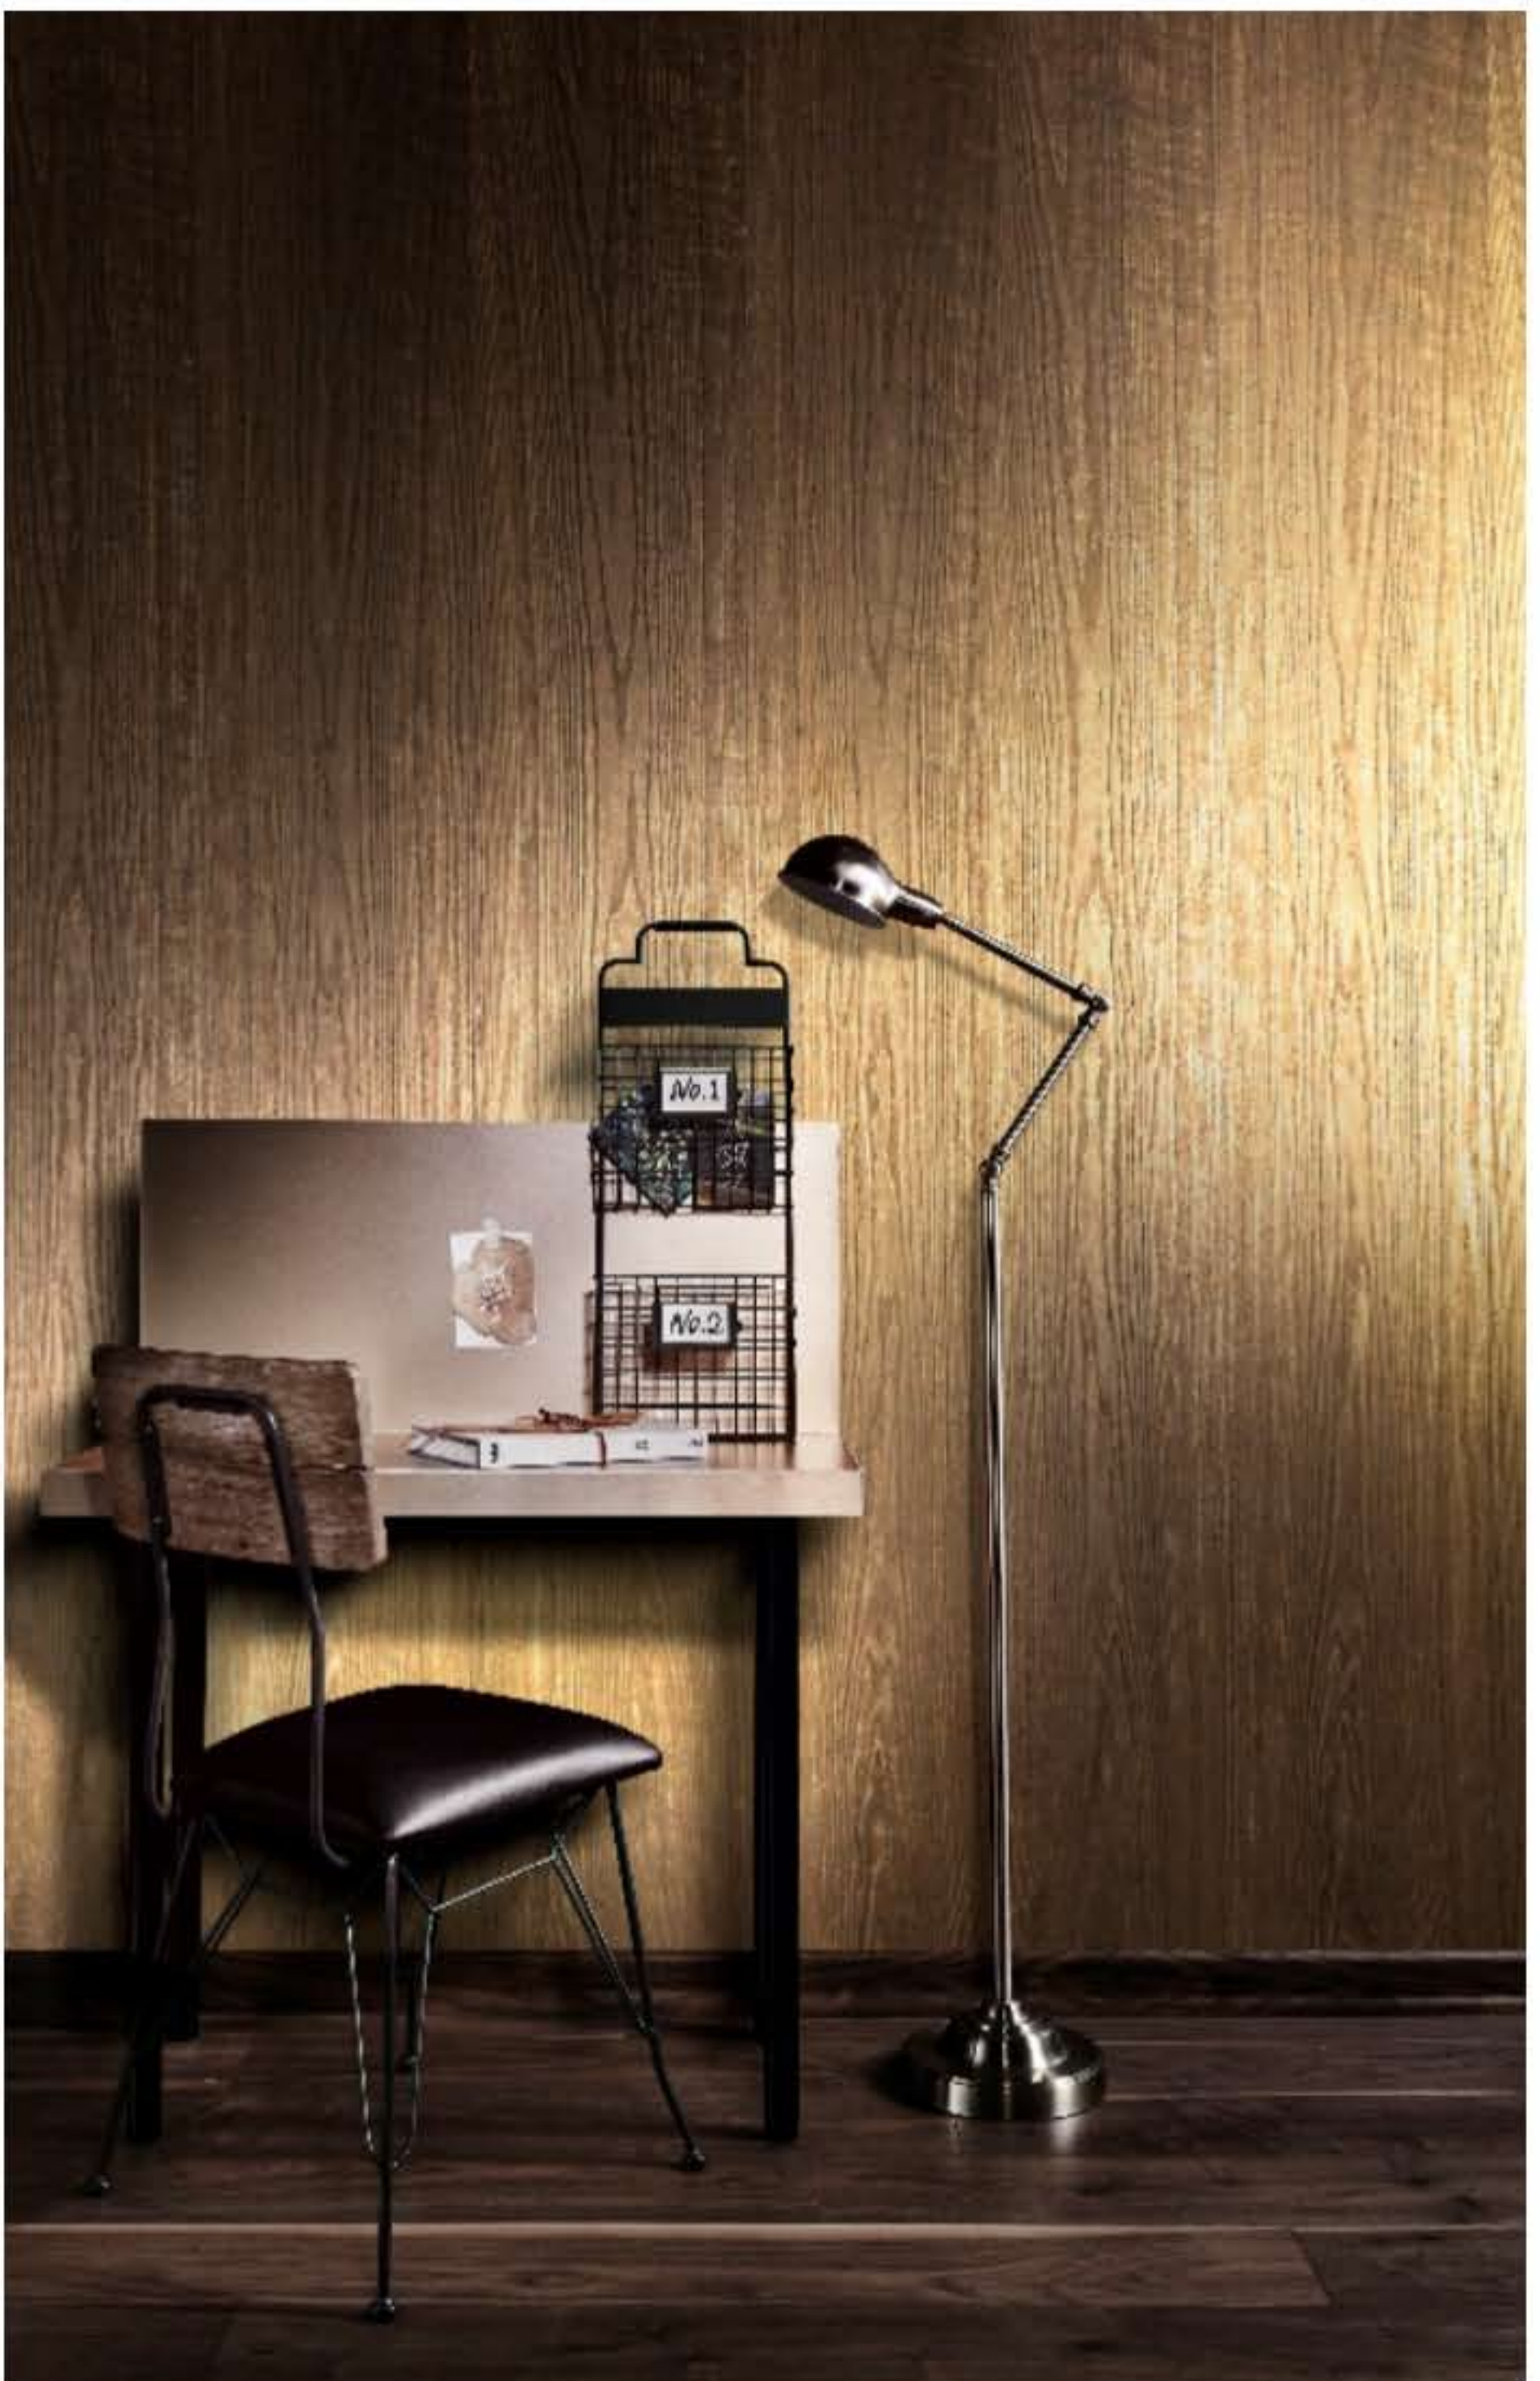

Here you can make the best use of existing miniature showpieces that add excitement to your work desk by using mason jars as a succulent or a pen holder.

Hide the clutter!

A simple yet clean work station paves way for a peaceful mind and a calm soul which holds the utmost priority amidst the pandemic. Moreover, it is important to maintain personal and environmental hygiene to keep oneself safe from the viruses. Well, worry not, as there are surfaces that can help you do that. Case in point, Laminates, which possess anti-bacterial properties and can be used on walls or table-tops. For instance, this Snuff Elm and Pure Elm from Greenlam Laminates, comes with an anti-bacterial property that makes-up for a hygienic and germ-free home for you and your family. Greenlam is the first laminate and compact brand in the country to introduce anti-bacterial surfaces as a standard offering over 10 years ago.

In order to achieve an effortless workstation, the key is to eliminate the clutter and have some breathing space. Arrange essential work stationary and gadgets on your desk to keep the space neat and tidy. As an important health advisory by the government, we too suggest to always keep a hand sanitizer at your work desk. This minimal workspace will help you focus while working at an optimum speed to achieve a work-life balance even while working from home.

The dramatic galore!

Leverage the eliminated travelling time during this lockdown period to design a workspace that exudes a strong sense of your individuality. For the ones who aim at creating a bold aura, bring out that dynamic attitude to your work area which will help you energize your mood and stay productive. Start with accentuating your table-top with a metallic stand to organize your stationary. Further, place a mini lamp shade whether in matte or glossy material which doubles-up as a lighting source and an alluring ornate.

Inject some vintage glamour to your wall veneers by embellishing them with fairy lights for an enchanting visual. For instance, when you place these lights on this Fig. Eucalyptus Brown veneer from Decowood Veneers, it beautifully enhances the natural textures of the veneer. The best part is that you don't have to make any additional purchases during the lockdown. If you are looking for a way to assemble your gadget wires and chargers, you can use jute baskets that can be conveniently found at your home. This dramatic theme will help you create a dynamic workspace that resonates with your energy.

A systematic working area makes all the difference and when designed well keeping in mind all the hygiene factors, it makes room for both, safety and productivity. With these easy to-do décors guide we assure you happy and hygienic working hours! **ENDS**
