

TRYST WITH PASTELS BY GREENLAM INDUSTRIES

Cool winters call for warm, evocative colours that create a sense of warmth in a space. One of the most sought after colour palettes this season are chic pastels that lend only a subtle hue, making the design the hero. Decowood Veneers by Greenlam Industries is offering a set of products for the winter - Pink + Munich Acacia + Light Red for smaller wood panels and storage slots, Oak Winter for floors in light shades of grey and blue with mettalic tints, and Steam Beech for decorative wall veneers. Minimal checked or pleated patterns take it up a notch higher.
