The rainy season with its promise of hot cups of tea and relishing fritters is just around the corner. While rains are always a welcome respite from scorching summer months, they bring with them quite a havoc. However, you can follow some home décor trends to transition to monsoon season to make the most of it.

It is that time of the season again when all you want to do is drop your chores and work from home to curl up with a book and a steaming cup of *chai* or coffee. Seasons are more than some stark changes in weather; they are an excellent opportunity to mix up the interior of your home. With the transition of **monsoon season** upon us, homes can tend to look dull and gloomy. However, it is the perfect time to revamp your space in efficient ways to suit the season. A great way to combat the dullness is by playing with textures in hues of warm and nature-inspired colours.

Here are a few tips to transform your home interiors and exteriors into a relaxing space that is best suited to enjoy during this season.

Exteriors for the win this season

When we talk about the home appeal, the relevance of **exterior décor** is equivalent to interior décor. With exteriors mostly being exposed to harsh weather during monsoons, picking an option to highlight and maintain your exterior is not as easy as you might think. One should always keep interiors in mind to decide on the exterior look and finish. It should be chosen wisely amongst the options, which should provide both beauty and durability.

The markets provide the perfect combination of looks, durability, and features these days. The wide variety of exterior compact laminates combined with fine detailing can uplift your house from a boring vintage to a modern contemporary household. These façade panels also come with many excellent features such as energy efficiency, fire retardancy, anti-graffiti properties, chemical, moisture, corrosion resistance, and an unmatched aesthetic appearance to your property. For life-long dependency in any season, most panels now come with a minimum of a 10-year warranty, are equipped with anti-bacterial and anti-fungal properties, and are also resistant to acid rains.

Choose effortless maintenance this season

While colours might be the quickest way to brighten up your home, maintaining the finish is just as important. Add products that are easy to clean and give a matt effect to your interiors. Inspired by timeless beauty, these surfaces look elegant as ever, leaving a vivid mark on their admirers all the while keeping them spotless. The laminates and compacts are anti-bacterial, anti-virus, almost zero reflection surface, hydro, mould and scratch-resistant too, making for effortless maintenance, making it a perfect choice for the monsoon season. These are also equipped with dimensional stability and non-toxic emissions for safe and hygienic space.

Monsoon season is ahead of us – just the right time for us to make necessary changes on the home front to give it a look that matches the playfulness of rains. Apart from the tips mentioned above, do not forget to place an umbrella holder right next to the entrance and door mats wherever possible.
