

INTERIOR INSIGHTS

Bring nature into your home

Adding wood to your interiors is a top trend for the season as it enables bringing the beauty of nature into your home.

Refurbishing your home this winter, and can't decide which interior trend to go with? Worry not! Inspired by silvered branches, wisps of wood smoke from bonfires and frosty window panes, we guide you to take your love for wood a notch higher. Adding wood to your interiors is a top trend this winter. Here are a few quick tips to bring beautiful nature into your home.

Quintessential elegance

Charismatic natural patterns that gives one's surroundings a tranquil feel is what's catching up this season. Decorative veneers that are made of real wood bring you a step closer to nature with its natural wood elegance. The twenties style with its metallic and mirrored surfaces is 'the talk of the town' this winter.

When walking into a space wrapped in beautiful wood finishes, there is a sense of luxury and elegance. Adding interesting interior veneer enhanced accessories into a home allows endless interior design possibilities.

NOTHING GIVES THE FEEL OF ELEGANCE AND LUXURY LIKE WOOD VENEER.

Elite designs

Custom light fixtures, accent furniture pieces, and even ultra-modern wooden rugs are just a few interior accessory ideas that can be created using natural veneer. Placing exotic veneers is an essential element in obtaining an elite de-

sign concept. Nothing gives the feel of elegance and luxury quite like wood veneer.

Floor them

Now that vintage is back again wood floors available in veneers are more popular than ever. They automatically uplift a living space. Wood flooring has all natural benefits as it is made of real wood. It projects a timeless appeal. We see more and more interior design enthusiasts decorate floors in wood nowadays. One trend that is here to stay is smoky interiors. Smoked wood and natural textures, these interior elements add a sense of mystery and intrigue to any living space.

Geometric inconsistency

Veneer made from thin layers of wood is the finest expression of nature indoors.

Did you know that every tree has a different texture; hence no one veneer will have the same look. This also means that the colour and pattern can vary within the same wood species.

Taking the escapist inspiration from historical explorers and naturalists pairing metallic with other vintage classics like a gigantic chest of drawers, coffee table or a vintage clock makes for a work of art.

Greenlam Industries Ltd. has brands like Greenlam laminates, New Mika, Mikasa - premium engineered floors and doors and Decowood veneers
