

Mikasa Herringbone Solitary Oak Sea Mist.

SALIENT FEATURES

PARUL MITTAL, DIRECTOR, GREENLAM INDUSTRIES LIMITED ON WHAT MAKES MIKASA STAND OUT:

*** TYPES**

The Herringbone collection comes in two variants – Solitary and Twine ranges. Whether it is the subtle and uniform pattern from the Solitary collection (created with the same product) or a flamboyant and trendy one from Twine collection (created using two different products together), you are bound to get completely floored by its captivating aesthetics that took Mother Nature as its muse.

*** FEATURES TO LOOK FORWARD TO...**

Engineered for stability and durability, the collection ensures warranties that go up to 30 years.

Brand Experience

MIKASA REAL WOOD FLOORS

"Backed with creativity in innovation, the Greenlam Industries stands as India's No.1 and Asia's largest brand in offering surfacing solutions, from veneers and laminates to wood flooring and doors," says Parul Mittal, Director, Greenlam Industries Limited.

"During the Roman Empire, when art, luxury and lifestyle went hand in hand, engineers stumbled upon interlocking criss-crossing patterns for roads, called Herringbone. These patterns were then picked up from the streets and were introduced into the homes for royals. Our frontier spirit gave birth to a modern classic inspiration, which we are proud to present as Mikasa Herringbone Collection," says Mittal.

With a presence in over 100 countries, Greenlam carries its innovation and artistry forward with Mikasa Real Wood Floors. The collection is carved out of ethically sourced exotic species of wood from across the globe. Made for the very first time in India, Mikasa is the sole manufacturer of engineered real wood floors in the country.
