Home interiors and styling have become intrinsic to integrating your personality into the home. So, clear your mind like a blank canvas and create a magical refuge of your own. Designing and arranging the interiors of your home to exude your personality is a daunting task, but here is a bunch of tips to help you with this process.

How often do you wish your room or space was designed in a particular fashion? Most of us have so many distinctive ideas going on in our minds and we eventually end up with an overwhelming urge to strip the room and start from scratch. Consider an empty space, similar to a blank canvas, where you have the liberty to transform your room using bold textures, contrasting colours, elegant patterns and modern furniture. This way, designing your room becomes more fun where the outcome is a personal expression of your raw thoughts.

We understand nailing interior styles can sometimes be tricky with trends constantly changing every now and then. To help you structure your décor instincts, here are a few tips to make an enchanting statement.

Calm indulgence

[The winter season](#), you can make the most out of your snuggly days by treating your bedroom like a tranquil retreat. Pick furniture upholstered in colours inspired by precious stones such as topaz, aquamarine or emerald. Layer your bed with bedsheets in classic blue and turquoise tones and create a definitive statement in your room. Add a super-soft rug to your floor with a woven rug in pastel yellow to keep your feet warm and cosy. You can use dim lighting to zone areas. This set-up will make way for comfortable sleep and a peaceful ambience.

Coming to the walls, experiment with decorative laminates which are scratch-resistant and available in various designs. Try a wood pattern laminate in grey colour which gives your space a natural appeal which will add a touch of whimsy to your comfy space. Surround yourself with nature and fresh air by placing a few planters, or you can also add vibrant accessories such as brass antiques and landscape paintings to uplift the mood. Soothe your senses by creating a cocoon of warmth and make the most out of the winter season.

A royal story

You can bring out those blue accents and make them as décor pieces to create a story in your space. A lot can be explored by playing around with this [refreshing colour](#) of sky and sea, which makes your home sing the songs of nature. If you like to keep your space uncluttered, then opt for minimal furniture. Go for an armchair paired with a silver metallic floor lamp-shade in creamy white hues. Allow your walls to reflect royalty by splashing undertones of navy blue, sapphire or teal. This seamless blend of colours will provide a subtle and contemporary vibe to your space.

These days, open shelves and cabinets in wood pattern laminates are ruling the vogue-chart. For instance, a mineral oak laminate has a woodgrain pattern which beautifully complements your grey-toned ceramics or black-rimmed picture frames. These accents exude vibrancy and immediately accentuate your walls. Bring an edge to your interiors by incorporating striped upholstery over your sofa, paired with a block printed cushion. With your serene imagination, create an aesthetically beautiful reading space or just a nook to unwind from a busy day.

Contemporary finesse

The dining area should be created with ultimate opulence to deliver an experience worth remembering. Whether it is your home or any commercial space, people prefer tailored services. Transform your dining space into a sleek and modern impression. Define your tables or kitchen counter with a gorgeous brown and beige marble countertop. Look for stools or chairs in dark shades of grey to balance the minimal aura in your space. You might as well use contrasting colours like light blue and faded orange to keep your colour scheme intact. For a timeless panache, use silver metallic ceiling hangings and table accents like a flower vase or salt-pepper shakers.

A modern and stylish backdrop can do wonders for your wall designs. An elegant rosewood laminate can instantly bring your interiors to life and enhance the look of your walls. Add more glamour and glow to your ambience by opting for white lighting. Marry all the elements well, and you are ready to spend leisure time eating with your family or friends.
