

## Black Beauty

When it comes to drama, nothing can ever beat black. Whether it is apparel, accessories or interiors. Which is why we have been so taken up with Greenlam Industries' new range of premium laminates in jet black. The company has launched three collections—Black X, Edgy Ash and Black Marmor.

The Black X range is mainly for bathrooms and is part of the company's AFX high pressure laminates category. AFX laminates are anti-fingerprint and easy to maintain. Edgy Ash is from the company's Solid Texture collection and helps you break the monotony of an all-white interior.

Black Marmor is from the High Pressure Laminate (HPL) category, that is made from multiple layers of top quality craft paper and decorative paper which are melamine resin-treated, then covered with overlay. The stone pattern in this range is ideal for both commercial as well as domestic settings. All prices on request.
