As the year comes to a close, and the new year comes knocking, you might be having thoughts about renovating your home and changing its overall appeal. There are endless possibilities to revamp your house with vibrant shades that can add glamour and radiance to your room.

Are you someone who comes across as an effervescent and chirpy personality? Instead of just [putting your personality](#) in your wardrobe, how about reflecting it on your walls? This winter season, go bold with classic colours on your walls to weave a cheerful environment and dare to be distinct with vibrant and lively colours.

It is time to rejoice this season by adding that much-needed sparkle and oomph to your space. Read on to find out how you can create your own happy place with splashes of colour and whimsical influences.

## Say hello to sunshine

Yellow is one of the brightest and happiest colours in the colour wheel which never fails to add a statement to your space. To [embrace this colour](#), place micro-commitments like sand candles with painted rocks on your table and graduate to glass hanging lights. Keep the rest of the décor neutral with white linen curtains and a grey bedding with a side table to balance the décor of your interiors. Natural light enhances this golden shade making the space even more enriching to the eyes.

For a cheerful ambience, sunset is a bold and unique laminate shade that can do wonders to your space. To seamlessly blend your upholstery with your walls, go for a chic armchair or a woven bean bag in solid shades of light blue or muted grey. It will add life and create a soothing aura to your interiors. Choose a velvet fabric adorned in polished black and olive tones for your rug to add some depth to your décor. These edgy elements will surely refresh your mood and add a ray of sunshine to your surroundings.

## A delightful paradise

The colour green exudes harmony, balance and growth along with promoting a peaceful ambience. Being a versatile colour, green walls are capable of broadcasting natural sparkle and stability. Bring home a rejuvenating retreat by opting for airy furniture like an open bookshelf and put spectacular net curtains in white colour. Look for wooden furniture and accessories for an inviting space. Succulents or glass planters placed on your bookshelf or table will refresh your interiors in no time.

Chalk grade laminate is becoming the latest buzz and is versatile, suitable for various spaces like your kitchen, bedroom, kid's playing room or even your meeting room. Let your creativity shine through with vibrant colours as these laminates come with a special surface for easy erasure of chalks. One can explore this laminate for writing personal notes, recipes in the kitchen, meeting agenda or end up discovering the hidden doodler within you. Avocado-green chalk grade laminate provides an elegant appeal to your space and complements your wooden furniture.

## Flavours of passion

Red is a colour of passion, love and strength. Whether it is used in clothes, makeup or home décor, it has the power to seize attention. Red walls, when paired with white furniture and gold accents, can heighten the luxury quotient in your space. You can opt for modern furniture wrapped in classic white colour or go for free-spirited shades of light brown. With brass accents and few elements of glassware placed on your central table, you can bring in the feel of royalty to your interiors.

To replicate the fierceness that comes with bold colours, go for the Red Flame laminate with engraved texturing. This laminate will provide a magnificent view and boost your brass accents. Though this wall colour stands out uplifting the rest of the décor in the room, you can still explore an abstract painting or place stunning Dutch plates for a vintage effect. The trend of wood floorings with slight textures looks fancy and voguish. Complete your décor with dark wooden floors, allowing your space to spill some excitement and warmth. This peppy look is perfect for this winter season when you want to generate some energy and grandeur in your room.

With great music, scrumptious food and contemporary outfits, give a flamboyant twist to your interiors. With the right combinations, all you need is a nice steaming cup of hot chocolate to make the most of the restful chill of winter.
