MESSAGE FROM THE MANAGING DIRECTOR & CEO

Leadership with purpose

At Greenlam, sustainability guides how we operate, manufacture, and build trust.

Our responsibility begins with the resources we use, and extends across our value chain.

From product safety and quality to renewable energy, water stewardship, agroforestry, along with our goal of zero waste to landfill, every initiative reflects our commitment to doing business the right way.

This journey is led through a structured ESG framework

with strong governance and accountability at every level.

Our ambition is clear. By 2030–31, we aim to achieve Net Zero emissions across Scope 1 and Scope 2 at our manufacturing facilities.

Sustainability, for us, is not an obligation. It is a pathway to long-term value for our business, our partners, and the future we share.

Saurabh Mittal
Managing Director & CEO
Greenlam Industries Limited

MESSAGE FROM THE DIRECTOR

Leadership with purpose

At Greenlam, design goes beyond surfaces. It shapes how we impact people and the planet.

Our ESG approach brings together climate action, efficient use of resources, employee well-being, and responsible business practices into one focused direction.

Culture is what people do when no one is watching, and ESG has slowly become part of our culture.

We see sustainability as a driver of innovation. It pushes us to improve processes,

rethink materials, and create solutions that are relevant for the world ahead.

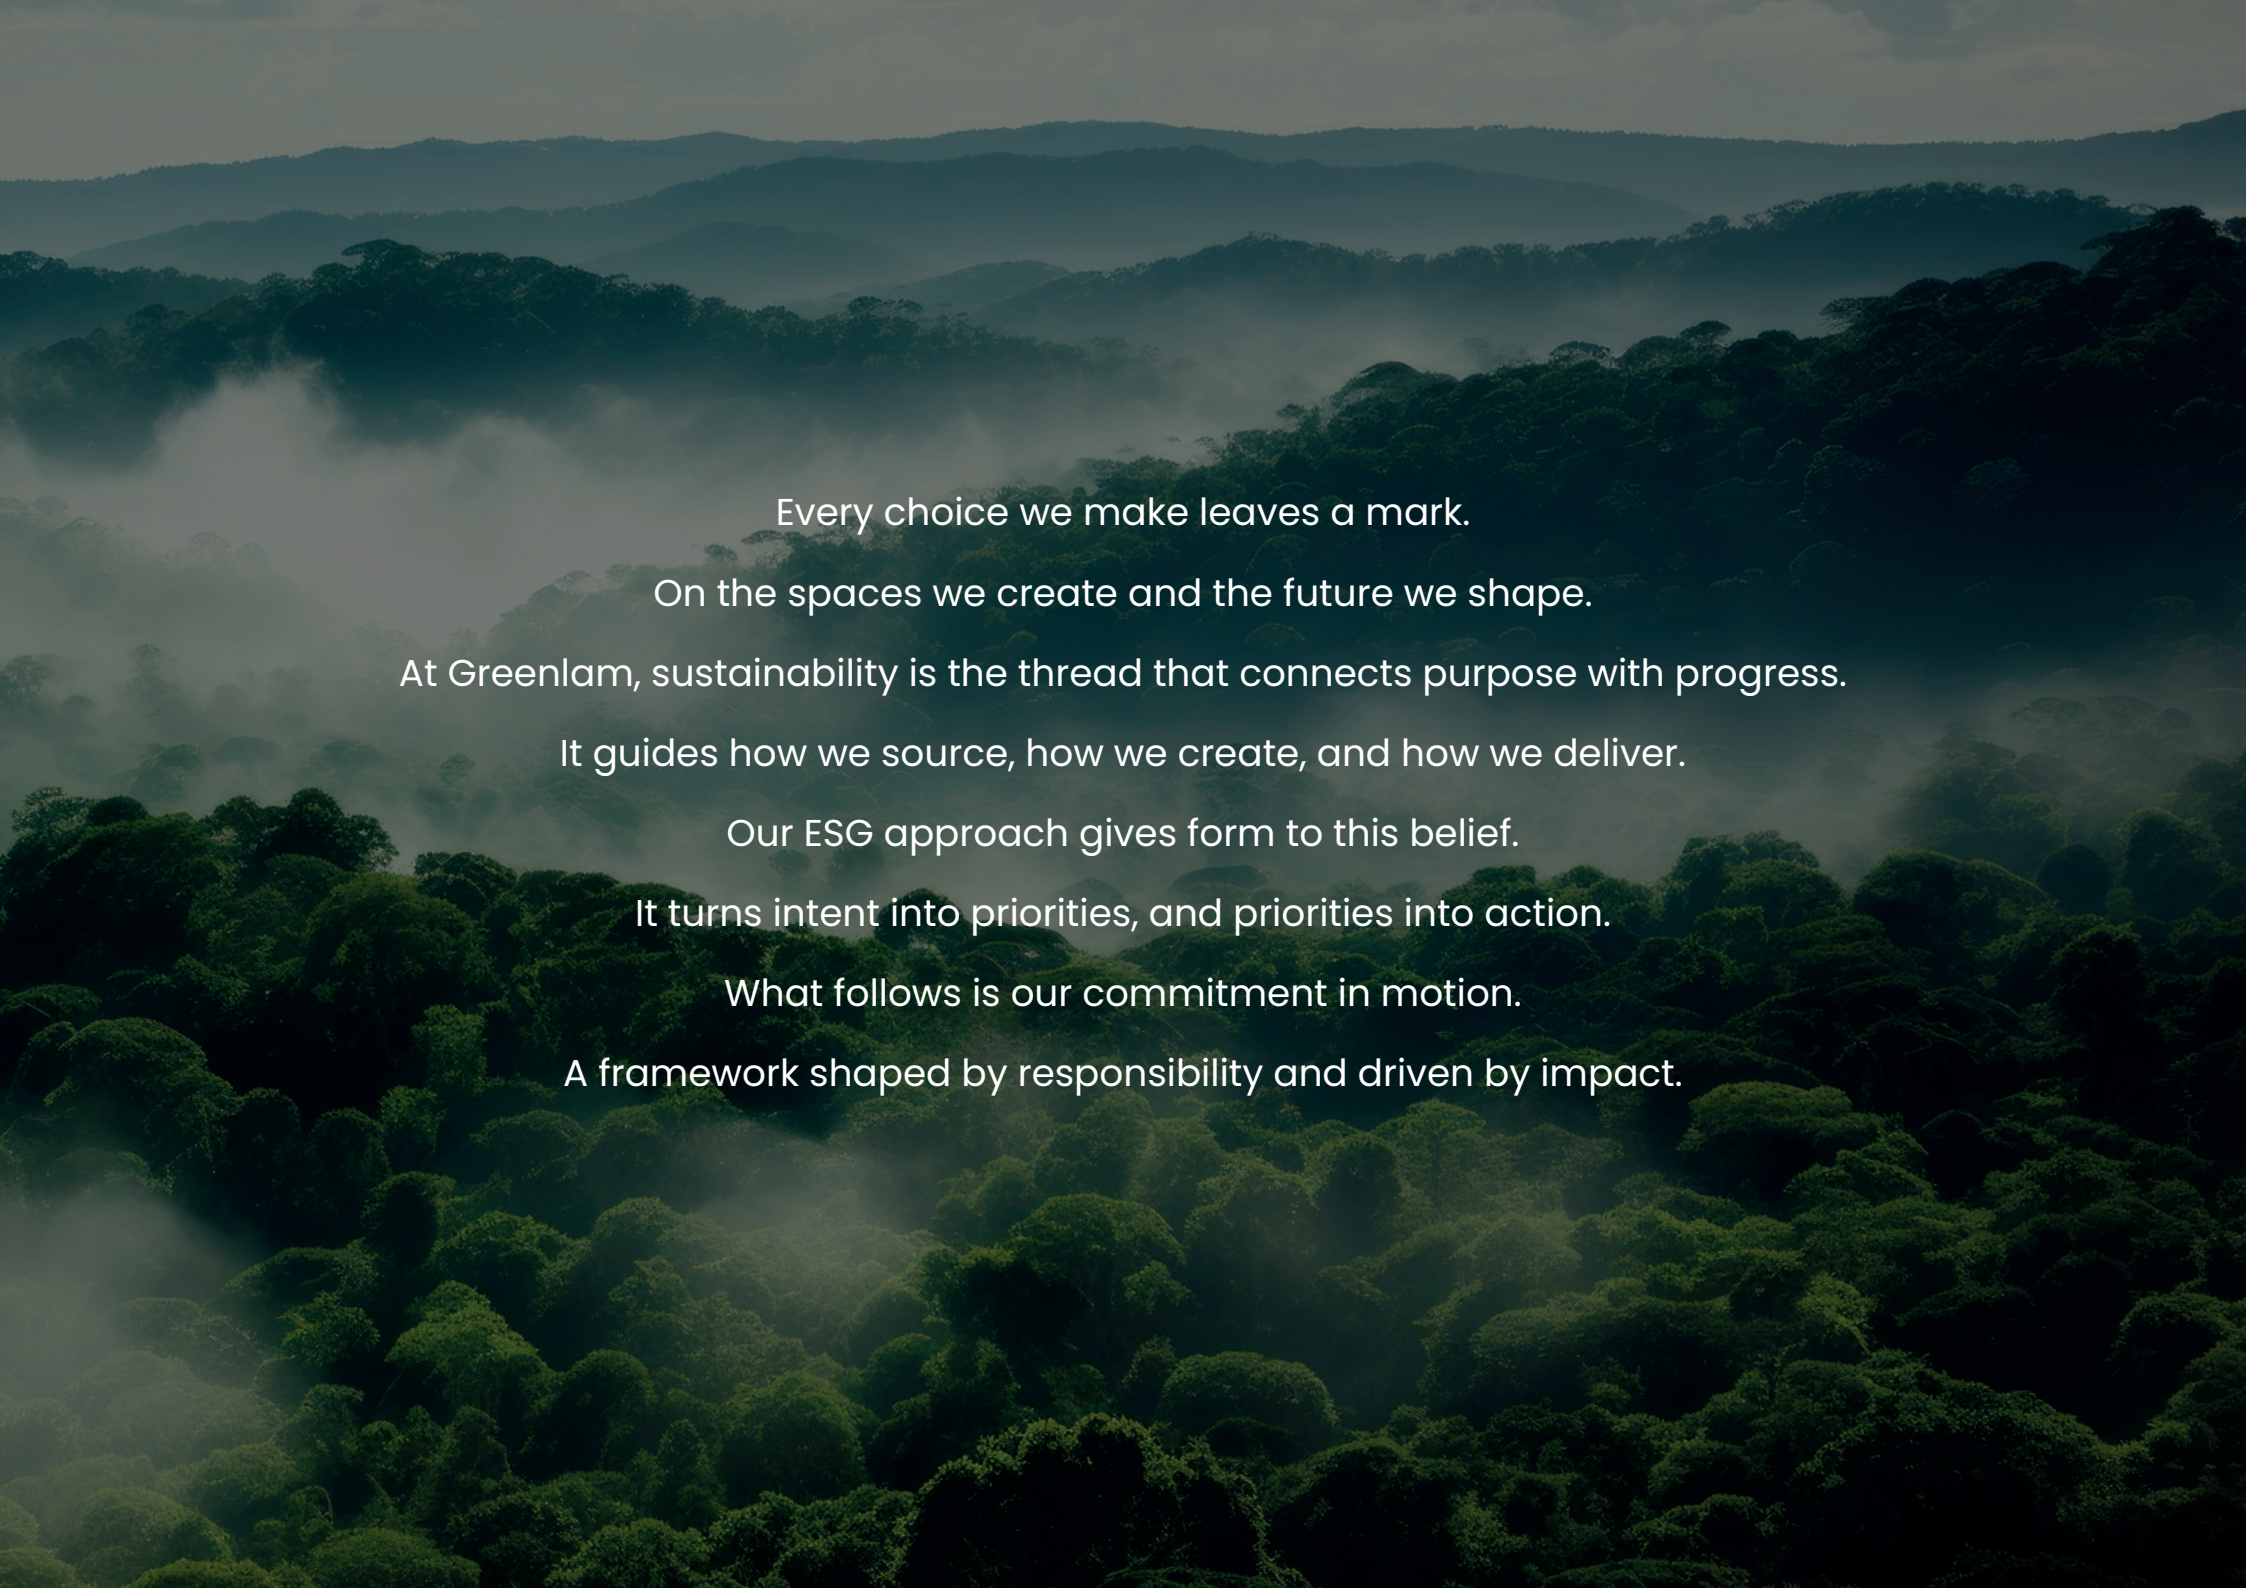

Our commitment is simple. To grow with integrity, lead with responsibility, and ensure that progress leaves a positive mark.

Parul Mittal
Director
Greenlam Industries Limited

Designing Tomorrow,
Responsibly.

Every choice we make leaves a mark.

On the spaces we create and the future we shape.

At Greenlam, sustainability is the thread that connects purpose with progress.

It guides how we source, how we create, and how we deliver.

Our ESG approach gives form to this belief.

It turns intent into priorities, and priorities into action.

What follows is our commitment in motion.

A framework shaped by responsibility and driven by impact.

ESG GOVERNANCE

How we lead and deliver

**Strong governance turns
commitment into action.**

At Greenlam, our ESG strategy is guided by a structured governance framework that ensures clear accountability, coordinated execution, and transparent reporting across the organisation.

ESG Governance Structure

DESIGNING TOMORROW, RESPONSIBLY.

Our sustainability vision, goals and commitments.

Growing responsibly and growing with awareness.

For us, responsible growth looks like growing with awareness of what we take, what we create, and what we leave behind. At Greenlam, sustainability is not a separate function. It is part of how we think, plan, and act.

Our vision is simple. To build a business that respects nature, supports people, and stands on strong values.

Our goals help us stay focused. They guide how we design products, manage resources, and shape our operations.

We commit to:

Using resources
thoughtfully and
restoring what we
consume

Reducing environmental
impact at every stage
of production and
operation

Creating value for
people through
safe, inclusive, and
ethical workplaces

This is how our vision becomes action, and action becomes a long-term impact.

What does ESG look like in everyday work?

Decisions guided by responsibility

Processes shaped by purpose

Actions measured by impact

At Greenlam, ESG is not a promise on paper. It is built into how we run our business. Our framework connects environment, society, and governance into one clear direction.

In practice, this means:

- Choosing responsible sourcing and efficient resource use
- Reducing emissions through cleaner energy choices
- Managing water and waste with care
- Putting safety, learning, and well-being first
- Upholding ethics, transparency and data responsibility

For us, walking the talk means doing the work. Every day.

MATERIALITY ANALYSIS

Focusing on what truly matters

Sustainability begins with listening, and engaging with our teams, partners, and stakeholders across our value chain to understand what matters most to them and to our business.

Through our materiality assessment, we identified:

The topics that
shape our
long-term
success

The concerns
that influence
trust and
transparency

The areas where
we can make
the greatest
difference

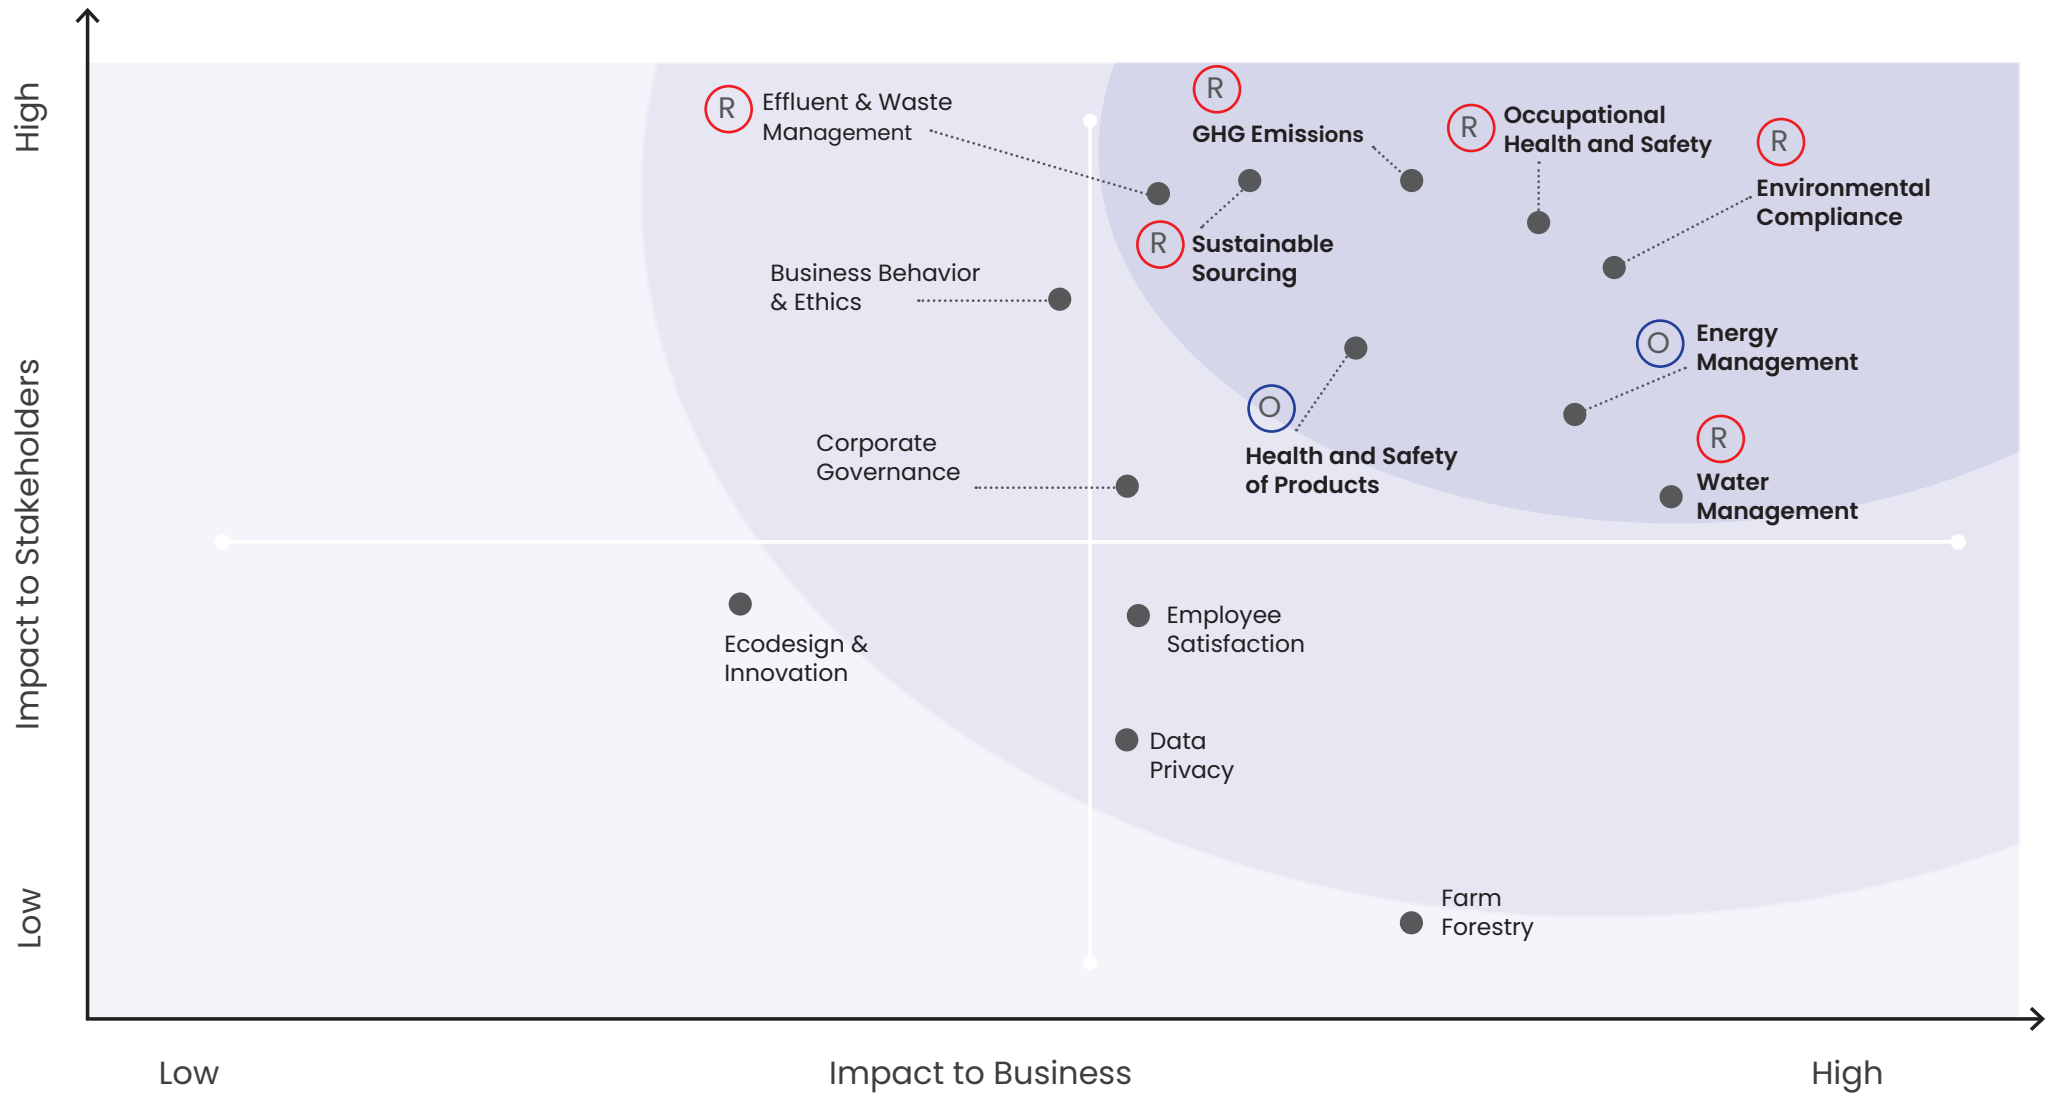

The Materiality Matrix basically shows the ESG topics that matter most to our stakeholders and have the greatest impact on our business. It maps priorities across two dimensions: importance to stakeholders and impact on Greenlam's business.

The issues positioned in the high-priority quadrant guide our ESG focus and help determine to choose wisely.

Where to act
to invest
to improve

**By focusing on what truly matters,
we ensure that our ESG journey stays
relevant, meaningful, and future-ready.**

MATERIALITY MATRIX

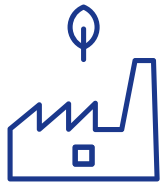

VIEW OUR ESG
COMMITMENTS

At Greenlam, sustainability is not driven by a single goal. It is shaped by four connected pillars that guide how we operate, innovate, and grow. Together, they help us balance progress with responsibility and ambition with accountability.

Our four pillars of sustainability

BETTER USE OF RESOURCES

From sourcing to production, we work to reduce waste, improve yields, and make thoughtful use of natural inputs.

BETTER FOR PLANET

We work to reduce our environmental footprint through cleaner energy, lower emissions, responsible water use, and improved waste management.

BETTER FOR PEOPLE

We work on creating safe workplaces, enabling learning, and supporting well-being across our organisation and communities.

BETTER WAYS TO DO BUSINESS

We work towards strengthening the foundations of ethical conduct, transparent governance, and responsible partnerships.

PILLAR 1

Better use of resources

At Greenlam, sustainability begins with how we use what the planet gives us. Not just inside our factories, but across our entire value chain.

Every choice we make is guided by one belief: responsible resource use today creates resilience for tomorrow.

Responsibility at every step

Sustainability does not end at our gates.

It travels with our materials, our partners, and our processes, from source to finished product.

*The Sustainable Development Goals (SDGs) are a global blueprint adopted by the UN to create a more sustainable, equitable, and prosperous future for all by 2030.

IMPACT

Forests conserved

Smarter materials

Waste reduced

Increased circularity

Our commitments at a glance:

50%

Of chipboard and plywood wood requirements to be met through locally sourced plantation wood by 2030.

20%

Reduction in waste generation by 2030

Zero

Waste to landfill by 2030

25%

Reduction in packaging by 2030

50%

Recycled kraft paper by 2027

75%

Local wood sourcing by 2030

50%

Wood from verifiable sources by 2035

10%

Sales from Eco-designed products by 2030

PILLAR 1: BETTER USE OF RESOURCES

Giving back to nature

Through **Vriksha Vriddhi Program**, our agroforestry initiative, we are creating a greener future by combining large-scale tree plantations with community participation.

The programme focuses on building a sustainable wood ecosystem while improving soil health and strengthening climate resilience. At the same time, it creates long-term value for farming communities by helping optimise land use, and generate stable income opportunities.

GREENLAM IN ACTION

- 6.8 million trees planted over last three years, transforming 5,800 acres of land into thriving green ecosystems.
- Greenlam has touched the lives of around 1000 farmers by motivating and enabling them to opt for scientific agroforestry in their marginal, fallow, and waste lands to earn sustainable additional income.
- Over 1,50,000 tonnes of CO₂ absorbed annually, strengthening our environmental impact which is equivalent to CO₂ emitted by over 33,000 fossil fuel cars.

A pair of hands is shown holding a small, vibrant green seedling with two leaves, which is growing out of a mound of dark, rich soil. The background is a soft, out-of-focus green with bright, circular bokeh light effects, suggesting a sunny outdoor environment. The hands are positioned on either side of the soil mound, gently supporting it.

OUR GOAL:

Plant 10 million trees by 2030,
expanding agroforestry
across thousands of acres.

PILLAR 1: BETTER USE OF RESOURCES

Maximum use. Minimum waste.

Our approach is centered on circularity, expanding the use of recycled and recovered materials, minimising waste generation, and progressing towards zero landfill. By keeping resources in use for longer through efficient processes and responsible resource management, we aim to maximise value while reducing environmental impact.

GREENLAM IN ACTION

- At our Tindivanam & Naidupeta plant, this philosophy comes to life through complete utilisation of wood raw material.
- Bark and veneer waste generated during wood peeling are utilised as boiler fuel, while surplus waste and roller cores are sent to Naidupeta for energy generation and chipboard production.
- Sawdust and sanding dust are also recovered and used as boiler fuel.

OUR GOAL:

Zero landfill by 2030.

PILLAR 2

Better for planet

Climate action at Greenlam is built into the way we operate. From energy choices to water stewardship, every initiative is designed to reduce impact while improving efficiency.

Our focus is clear

Cut
emissions

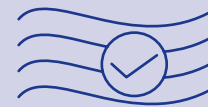

Conserve
water

Build
resilience

IMPACT

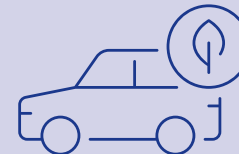

Reduced carbon footprint

Improved air quality

Water positive

Lower transport emissions

*The Sustainable Development Goals (SDGs) are a global blueprint adopted by the UN to create a more sustainable, equitable, and prosperous future for all by 2030.

Our commitments at a glance:

20%

Reduction in
water intensity
by 2030

Net Zero CO₂
(Scope 1 & 2, at
manufacturing level)
by 2030

12%

Reduction in
energy intensity
by 2030

Water positive
by 2027

20%

Cut in transport
emissions (upstream &
downstream) by 2030

Continue to be
100% compliant
with environmental
regulations

PILLAR 2: BETTER FOR PLANET

Our net-zero journey

We are rethinking step-by-step on how to reduce emissions at manufacturing level.

Our energy journey is evolving from dependence to diversification. From bio-fuels to renewable power, cleaner energy now plays a central role in powering our operations.

Energy efficiency is one of the fastest ways to cut emissions.

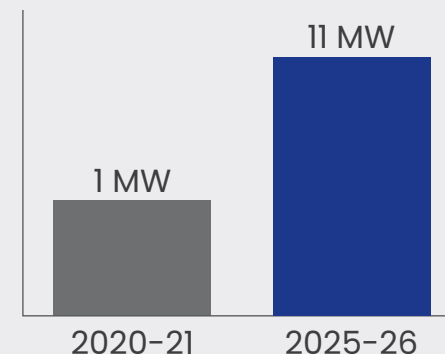

What's driving the change:

High-efficiency machines and elimination of energy leakages

Dedicated energy management teams at every manufacturing unit

Real-time monitoring to identify and correct inefficiencies early

GREENLAM IN ACTION

Increasing our renewable power capacity from 1 MW in FY 2020-21 to 11 MW in FY 2025-26.

We have doubled our renewable fuel consumption in last 5 years, saving almost 1,50,000 tonnes of CO², equivalent to carbon sequestered by 6.8 million trees.

OUR GOAL:

Net zero Scope 1 and 2
emissions at manufacturing
plant by 2030.

Greenlam Industries – Nalagarh Plant

PILLAR 2: BETTER FOR PLANET

Water stewardship

Water is a shared resource. We use it carefully, reuse it responsibly, and replenish it wherever possible. Guided by a commitment to responsible resource management, we continuously enhance operational efficiency and adopt practices that support long-term water conservation. By protecting this vital resource today, we help strengthen ecosystems, support communities, and contribute to a more sustainable future.

GREENLAM IN ACTION

- Zero Liquid Discharge across manufacturing operations.
- Rainwater harvesting through 97 recharge pits, capturing up to 1.4 million litres annually.
- Efficient ETP/STP systems with water recycling across factories.
- At the Behror plant, a Pressurised Hot Water Generator saves 90 KLD, conserving nearly 31.5 million litres annually.
- 64 million litres of water saved over a period of five years, through improving water intensity at our plants. This is equivalent to water needs of almost 1,20,000 families for a day.

OUR GOAL:

Water Positive by 2027.

PILLAR 2: BETTER FOR PLANET

Our water innovation

Beyond our operations, Greenlam extends this commitment through its CSR initiatives as well. Through the restoration of ponds, creation of check dams, and installation of community RO systems, we support groundwater recharge and improve access to clean water. And by empowering Village Development Committees, we also enable community-led stewardship and long-term care of shared water assets.

GREENLAM IN ACTION

Greenlam has developed 5 community ponds near its manufacturing facilities at Behror and Nalagarh with a total capacity of 55,000 KL.

Community Pond at Greenlam Industries – Behror Plant

PILLAR 2: BETTER FOR PLANET

Reducing air pollution **at source**

Cleaner air is not just an outcome. It is a responsibility. At Greenlam, we invest in advanced air pollution control systems to minimise emissions across our manufacturing operations. Electrostatic Precipitators (ESPs) and other filtration technologies help capture particulate matter effectively, ensuring cleaner air within and around our plants.

Compliance is the baseline. Leadership remains the goal.

GREENLAM IN ACTION

- State-of-the-art pollution-control equipment, including Electrostatic Precipitators (ESPs), Continuous Emission Monitoring Systems (CEMS), wet scrubbers and multi-cyclone systems, are deployed across manufacturing units
- Advanced air filtration systems to control particulate emissions.
- Continuous monitoring of VOCs.

PILLAR 2: BETTER FOR PLANET

Adopting sustainable logistics

Reducing emissions does not stop at the factory gate. Our logistics strategy focuses on efficiency, localisation, and cleaner transport. By optimising routes, improving load efficiency, and strengthening regional supply networks, we aim to reduce transportation-related emissions while delivering products responsibly and efficiently.

GREENLAM IN ACTION

- 60% of raw material is sourced domestically.
- 90% of wood used in chipboard and plywood manufacturing is being sourced domestically.
- Increased focus on domestic sourcing without compromising quality.
- Sourcing of few critical raw material like baseply used in decorative veneer, engineered door core & peel coat used in laminate and melamine faced chipboard have been shifted from imports to domestic.
- Adoption of low-emission vehicles and smarter route planning.

PILLAR 3

Better for people

At Greenlam, growth begins with people. Their safety, well-being, and sense of belonging shape how we work and how we lead.

This pillar is about creating workplaces that are safe, inclusive, and enabling. Places where people feel protected, supported, and inspired to do their best work.

*The Sustainable Development Goals (SDGs) are a global blueprint adopted by the UN to create a more sustainable, equitable, and prosperous future for all by 2030.

IMPACT

Safer
workplace

Capable
workforce

Stronger
families

More resilient
communities

Long-term
organisational
resilience

Our commitments at a glance:

Procure a recognised safety certification by March 2027

L&D

Access for all employees

50%

Reduction in Total Reportable Incident Rate by March 2027 (vs September 2025)

100%

Medical insurance & financial protection for all on-roll employees

10%

Improvement in bottom 3 areas of employee satisfaction

PILLAR 3: BETTER FOR PEOPLE

Occupational health and safety

Safety at Greenlam is not a process. Our approach is anchored in globally recognised standards, with manufacturing units aligned to ISO 45001 certification, ensuring a structured and consistent framework for managing health and safety risks.

GREENLAM IN ACTION

- 100% medical insurance and financial protection for all on-roll employees.
- Institutionalised Greenlam Learning & Development (L&D) wing for continuous access to learning and development opportunities.
- Implemented structured employee engagement and feedback mechanism.
- Occupational safety initiatives being undertaken at all manufacturing units with safety walks, VFLs, Toolbox talks, Monthly reporting on selected KPIs.
- Significantly enhanced visual safety at our manufacturing units and RDCs.

Our progress so far:

139%

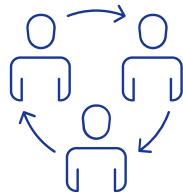

Increase in reported unsafe acts and conditions, driven by greater employee participation and safety awareness.

Maintained a TRIR of 1.0 across all manufacturing units, driven by proactive risk management.

1000+

Safety training sessions conducted, covering 92% of the permanent and contract workforce.

Stronger employee and workmen engagement, leading to better participation and accountability across operations.

PILLAR 3: BETTER FOR PEOPLE

Learning and development

We believe learning should be accessible to everyone. From frontline teams to leadership, development is a continuous journey.

Growing skills. Unlocking potential.

Our focus areas:

Skill enhancement
aligned to
evolving roles and
technologies

Leadership
development
for future-
ready teams

Equal access to
training across
functions and
levels

GREENLAM IN ACTION

- Through our community initiatives, we support education and skill development for young people, creating pathways to opportunity and self-reliance.
- Our efforts focus on improving access to learning, creating safe educational spaces, and equipping youth with skills for the future.
- We also work to promote health and well-being by organising health camps and improving access to essential healthcare services.

PILLAR 4

Better ways to do business

At Greenlam, sustainability is not limited to environmental and social action. It is embedded in how we govern, how we partner, and how we make decisions. Strong systems. Ethical conduct. Transparent processes. This is how we build long-term value.

*The Sustainable Development Goals (SDGs) are a global blueprint adopted by the UN to create a more sustainable, equitable, and prosperous future for all by 2030.

IMPACT

Secure
digital systems

Long-term business
resilience

Trust with
stakeholders

Stronger risk
oversight

Resilient supply
chain

Our commitments at a glance:

>8.5/10

Net Promoter Score

90%

Suppliers aligned with
Code of Conduct by 2027

Supplier sustainability
tracked for strategic
partners by 2027

Positive, lasting impact
on communities &
harvesters

100%

Staff trained annually on
compliance & ethics

100%

Adherence to Business
Responsibility Policy

**COSO-aligned risk
management compliance**

**Leadership-level ESG
rating** from reputed
agencies

PILLAR 4: BETTER WAY TO DO BUSINESS

Responsible governance

Clear oversight. Strong accountability.

Our governance framework is built on transparency, integrity, and accountability. By embedding ethical practices into every aspect of our business, we foster a culture of responsible leadership, informed decision-making, and sustainable value creation. Strong governance enables us to navigate evolving challenges while maintaining the trust of our stakeholders.

GREENLAM IN ACTION

- Board-level oversight of ESG priorities and performance
- Clearly defined roles and responsibilities across leadership and management
- Regular monitoring and reviews to track progress against commitments

PILLAR 4: BETTER WAY TO DO BUSINESS

Supply chain sustainability

Responsibility that extends beyond our walls.

Our partners play a critical role in our sustainability journey. We work closely with suppliers to ensure ethical practices, responsible sourcing, and compliance across the value chain.

GREENLAM IN ACTION

- Over 60% of our suppliers confirmed to our comprehensive Business Partner Code of Conduct, reinforcing ethical business practices, environmental responsibility, and human rights standards
- Preference for partners who demonstrate strong alignment with our sustainability vision and values
- Robust supplier evaluations across environmental, social, and ethical parameters to drive long-term, collaborative sustainability progress

PILLAR 4: BETTER WAY TO DO BUSINESS

Business ethics

Doing the right thing. Every time.

Integrity guides every interaction at Greenlam.

We expect the highest ethical standards from our employees, partners, and contractors.

Our ethical framework includes:

A robust Code of Business Ethics and Conduct (CoBEC) applicable across the organisation for employees

Zero tolerance for bribery, corruption, or unfair practices

Clear reporting mechanisms and protection for whistleblowers

PILLAR 4: BETTER WAY TO DO BUSINESS

Risk management

Risk management at Greenlam follows the COSO framework, enabling us to identify, assess, and mitigate risks across operations, strategy, and compliance.

Our focus areas:

Proactive identification of operational, financial, and ESG risks

Regular reviews and updates to risk mitigation plans

Integration of risk considerations into strategic decision-making

Together, these practices ensure that sustainability at Greenlam is not just a promise but a system, one that supports ethical growth, protects stakeholders, and strengthens trust over the long term.

PILLAR 4: BETTER WAY TO DO BUSINESS

Data privacy and IT security

At Greenlam, we treat data with the same care as any critical asset. Customer information, employee details, and sensitive business data are handled responsibly and securely.

Our approach is simple:

Keep data safe | Use it responsibly | Protect our systems at all times

How do we do this?

- Compliance with applicable data protection laws, including India's Digital Personal Data Protection Act, with implementation in progress.
- Regular benchmarking against global good practices.
- Mandatory employee training on data privacy and cybersecurity awareness.

Our security framework includes:

Strong
identity
and access
controls

Secure
backups
and data
encryption

Advanced
cybersecurity tools
for threat detection
and response

Regular internal reviews
and independent
third-party security
assessments

We maintain a robust disaster recovery plan to ensure business continuity and carefully assess the security practices of all technology and cloud partners.

Environmental Credentials

We are proud to exceed the industry benchmark in the area of green certifications. In particular, rigorous tests have shown that Greenlam laminates emit minimal levels of VOCs**, which have the potential to adversely impact the health of people that are exposed, and are certified to be suitable for use in environments where children may spend significant periods of time, such as hospitals and clinics.

About Greenlam

Greenlam is amongst the world's top 3, Asia's largest and India's No. 1 surfacing solutions brand. With its presence in over 120+ countries, Greenlam has focused on developing quality products with a great passion for innovation. It offers end-to-end surfacing solutions spread across decorative laminates, compact laminates, interior and exterior clads, restroom cubicles and locker solutions, decorative veneers, engineered wooden floors, doors, plywood and pre-laminated chipboard. With multiple state-of-the-art manufacturing facilities across the country, it is the first choice of architects, interior designers, and homeowners when it comes to transforming living spaces. We work in harmony with our environment. Greenlam thinks and acts to save and preserve nature in its pristine form by ethical sourcing of its raw materials from the world over. Coupled with this, the products offered by Greenlam are Greenguard Certified, Anti-virus, Anti-bacterial & Anti-fungal, thereby ensuring they are environment-friendly and safe to use. With robust network of over 30,000 distributors and dealers, Greenlam is just a call away to give your spaces a new look.

PRODUCT PORTFOLIO

Greenlam Laminates & Allied Products

A result of an undying passion for craft, technology and art; Greenlam product range can work with almost any style of decor. Offering breakthrough designs and stunning textures which are incredibly gorgeous and strikingly creative.

Designed to transform dull spaces to a lively paradise, each variant of laminate is complemented by exquisite detailing and understated, to say the least.

As Asia's leading manufacturer of high pressure laminates, Greenlam offers you durable and decorative Compact Laminates. The perfect choice to build your ideal interior and exterior. While their sturdiness makes them apt for a wide range of applications, their spectacular colours make them more desirable.

LAMINATE AND ALLIED PRODUCTS

POSTFORMING

Designed exclusively to enhance the aesthetics of your interiors while preventing water seepage in crevices and moisture retention. Armed with added flexibility and malleability, these laminates can be applied on shutters, counter tops, furniture tops, etc.

LEXUS

1.50MM LAMINATE COLLECTION

The Fluted Laminate Collection in 1.50 mm thickness is a mark of innovation and aesthetics in the surface solutions industry. Engineered for superior durability, it offers an exclusive range of decorative laminates inspired by 3D fluted patterns, delivering depth and design versatility.

HD GLOSS

A superior gloss laminate empowered with the best-in-class scuff, abrasion, and MAR resistance to resist permanent deformation or micro scratches resulting from the application.

DOOR

LAMINATES & COMPACTS

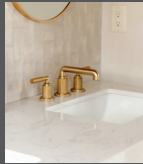

A range so perfectly fit for doors, these laminates not only clad your doors seamlessly but also make them look beautiful. Available in a specialised 3'x7' size to cater to your every need.

FOURxTEN

TEN FEET LAMINATE COLLECTION

Presenting, exclusive 4' x 10' laminate collection. With its long height and perfect finishing, the 4' x 10' laminate is apt for panelling in spaces with a high ceiling height. It is also a good choice to cover long surfaces in furniture design. It offers seamless finishing to your spaces by reducing the joints.

COUNTERTOP

LAMINATES & COMPACKTS

A perfect fit when it comes to kitchen and bathroom settings, these laminates are remarkably elegant, modern and at the same time are resistant to stains, moisture and abrasions. Available in a wide range of decors to add to your taste of stylish interiors.

ELECTROSTATIC DISSIPATIVE

LAMINATES & COMPACKTS

Static electricity isn't just a nuisance, it costs billions annually. Greenlam's Electrostatic Dissipative (ESD) Compacts and Laminates offer a cutting-edge solution for high-risk environments. Engineered with advanced technology, they safely dissipate static charges, reduce the risk of sparking, protect sensitive equipment, and prevent dust buildup, ensuring a cleaner and safer workspace.

DECOLINER

LINER GRADE LAMINATES

Range of low maintenance liner grade laminates that add a new dimension to your craftsmanship. Make your cabinets, workspace partitions, cupboards, back panel of kitchen & wardrobes as beautiful inside as they are outside.

AFX

ANTI FINGERPRINT SURFACES

A revolutionary ultra-matt surfacing solution from Greenlam that looks so beautiful you cannot resist touching it. Touch all you want because the craftsmanship that leaves a lasting impression ensures no fingerprint or stains spoil its beauty. Designed for both horizontal and vertical applications, these laminates and compacts are anti-virus, anti-bacterial, hydro, mould, and scratch-resistant too – which means they are easy to maintain and safe.

UNICORE

LAMINATES & COMPACKTS

Designed with a passion for craft and technology, these uni-coloured laminates and compacts discard the dark edges. Made with uniform decorative layers they offer seamless edging and brimming with the same decor vibrancy.

CHALK & MARKER GRADE

LAMINATES & COMPACKTS

Two premium ranges of laminates & compacts, available in the most popular colours. These laminates and compacts, when wiped or erased, turn spotless and live much longer than the traditional boards in schools and corporate houses.

DIGITAL & CUSTOM

LAMINATES & COMPACKTS

Fashioned for the most seasoned of artistic minds, Greenlam Digital laminates and compacts are a range of bold designs that are digitally printed on the panels. These laminates and compacts can also be customised to craft inspirational spaces complementing your persona. Just share your photographs and designs, and we'll convert them into surfaces, just the way you want them.

FIRE RETARDANT

LAMINATES & COMPACKTS

Treated with imported fire retardant chemicals which help in delaying temperature rise, making it resistant to temperature rise and fire. Available in a variety of colours and designs, these laminates and compacts are high in aesthetic appeal and ensure secured environment.

LAB GUARDIAN

CHEMICAL RESISTANT HPL & COMPACKTS

Chemical Resistant Compact & Laminates, designed specifically to shield surfaces from chemical abuse.

COMPACT LAMINATE

Greenlam Compact Laminates is the quintessential product when it comes to demanding and functional surfaces. Crafted for both vertical and horizontal applications, these durable and self-supporting decorative panels are the right choice for panelling, modular restroom cubicles, partitions, worktops, institutional furniture, and lockers.

SANDWICH COMPACT

The result of our cutting-edge technology, these revolutionary laminates have solid coloured patterns over the edges to add an extra edge of magnificence.

CLADS

Interior Grade Compact Laminate crafted to beautify your interiors, made from solid grade high pressure Compact Laminates.

CLADS

Exterior Grade Compact Laminates with unmatched GLE technology, designed to make exteriors enthralling and gripping.

STURDO

Presenting a new world of restroom cubicles and locker solutions studded with innovative designs and unique features. Enabling you to design your world your way with its customisation feature, it offers you innovative and bold patterns & themes to turn spaces into marvels.

SHOWER SURFACES

Tiles have graced your bath walls for ages. And probably that's why they've gone out-of-date. Presenting Greenlam Shower Surfaces, a surface decor solution designed to make tiles a thing of history. Easy to maintain, durable, and unsurprisingly highly water-resistant, these compacts are here to redefine the definition of style.

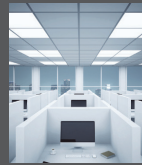

STRATUS

Transform your space into a work of art with Stratus Surface Solutions by Greenlam. Crafted to elevate modern interiors, the range features High Pressure Laminates (HPL) and Compact Laminates, ideal for worktops, breakfast bars, splashbacks, upstands, and tabletops in a seamlessly coordinated design. Elegant, durable, and easy-to-install, these temperature-neutral surfaces bring a rich tactile appeal and sophisticated character to every space.

COMPOSITE PANEL

Greenlam Composite Panels deliver superior strength and durability with sleek aesthetics. Perfect for workstation partitions, bathroom doors and other self-supporting vertical applications. They ensure long-lasting performance and low maintenance.

MFC

Fused with excellent machinability, superior screw-holding power & smooth surface finish, these Melamine Faced Chip Boards are crafted to add perfection to the spaces. Offering a very wide range of stunning designs, they are ideal for both commercial and residential spaces.

WOOD AND ALLIED PRODUCTS

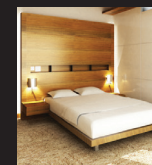

An innovative transformation of diligently crafted plywood, with its simple, sharp, and an effective range, Mikasa Plywood products come devoid of any confusing features and boasts of great efficacy. The entire range of plywood and blockboard is empowered by The Deca Edge Technology and is manufactured with eco and socio-consciousness by the most advanced machineries at the state-of-the-art facility.

A premium range of natural decorative veneers that make your interiors naturally beautiful. This exclusive range of veneers brings you the world's most exotic timbers offering you more than 200 species of woods. Available in Natural / Teak / Engineered.

Mikasa real wood floors, produced in India for the first time, draws inspiration from a Spanish phrase "Mi Casa Es Su Casa", which means, "My home is your home". Mikasa is inspired by wood. Each piece of wood is enhanced using the latest technology, thus bringing out the true character of wood. It offers the largest collection of engineered wooden flooring in various thicknesses and sizes. We create the finest floors. For those who have the finest taste.

Unlike traditional doors, Mikasa offers complete door solutions. Ready to fit, engineered from real wood, superior factory-finished products make you look at the doors in a whole new light.
